

# Certified Information Systems Security Professional - CISSP

**Skills for Change**  
Diversity at Work™

*TechSkills* offers only instructor-led classes. Our classes are limited in size so you have more hands-on interaction with the instructor. We provide experienced instructors, quality training materials and competitive pricing.

## Are you an Information Technology Professional and plan to build a career in information security?

This course will help you build skills in Information Security Management as well as preparing you to write the CISSP or Associate of (ICS)2 certification exam. During the course, you will write three tests that simulate the CISSP certification exam. Each test is three hours in length.

### Who is this course for?

Anyone with IT work experience anywhere in the world or IT graduates who want to build a career in IT Security.

### Course Outline:

- Information Security and Risk Management
- Security Architecture and Design
- Access Control
- Application Security
- Operations Security
- Physical (Environmental) Security
- Cryptography
- Telecommunications and Network Security
- Business Continuity and Disaster Recovery Planning
- Legal regulations, compliance and investigation

### Why get CISSP or Associate of CISSP Certification?

- CISSP is one of the top 10 certifications in demand in 2009 ([www.about.com](http://www.about.com))
- In a recent global survey, 90% of managers responsible for hiring Information Security staff indicated that it is important for their staff to have Information Security Certification ([www.globalknowledge.com](http://www.globalknowledge.com)).

### How do I become certified?

- Pass the CISSP Exam
- Apply for certification from the governing body of CISSP and Associate of CISSP
