

Microsoft Access 2007

Skills for Change
Diversity at Work™

TechSkills offers only instructor-led classes. Our classes are limited in size so you have more hands-on interaction with the instructor. We provide experienced instructors, quality training materials and competitive pricing.

Access is a database program you can use to store and manage large quantities of data - either personal, or business. The data is organized into related tables which you can easily modify and expand. Access also offers some powerful data analysis tools - filtering, sorting, querying- that let you obtain specific

Information from the database.

Course content

Day 1*

Getting to Know the Access Window; The Ribbon, the Quick Access Toolbar, and the Context Menu; Database Basics; Database Objects - Tables, Creating a Table, Specifying Data Types and Field Properties; Entering Data in a Table - Using Data-sheet View, Using an Auto Form, Modifying a table; Planning and Defining Table Relationships; Filtering/Sorting Data

Day 2*

Database Objects - Forms; Creating a Form Using the Wizard; Modifying a Form in Design View; Using a Form to View/Modify the Data in the Tables; Database Objects - Queries; Performing a Simple Query; Adding Query Conditions

Day 3*

Creating a Parameter Query; Database Objects - Reports; Creating a Report Using a Wizard; Modifying a Report in Design View
